

OPERATING INSTRUCTIONS
AND PARTS LIST FOR

POWER PRIDE
SELF-PROPELLED LAWN SWEEPER
Model DS-6225

NOTICE: These instructions were written to assist you in assembling your Lawn Sweeper quickly and correctly. Read instructions thoroughly before attempting assembly so that you are familiar with the complete procedure.

MIAMI INC.

Box 295

SPRINGFIELD, OHIO

DIVISION OF PARKER SWEEPER COMPANY

ASSEMBLY INSTRUCTIONS

1. Turn the screws, nuts, and washers, Ref. Nos. 5, 6, and 7, Fig. 2, around, so that heads of screws are on inside of handle. Bring upper handle, Ref. No. 46, Fig. 2, into its proper position so that it nests with the two lower handles, Ref. No. 12, Fig. 2, and tighten screws and nuts securely.
 2. Insert second screw and nut, Ref. Nos. 33 and 4, Fig. 2, through clutch control rods, Ref. Nos. 31 and 34, and tighten both screws holding these pieces together.
 3. Bolt both handle support rods, Ref. No. 23, Fig. 1, to lower tubular frame, Ref. No. 24, Fig. 1.
 4. Place basket, Ref. No. 48, Fig. 2, into brackets.
 5. Change engine mounting base to middle position as shown on front cover so that engine is approximately level — 3 positions are provided so that engine is always approximately level throughout the entire range of brush adjustment.
- Read the operating instructions for Adjustment and Maintenance.

OPERATING INSTRUCTIONS

IMPORTANT: Read engine manual carefully before operating, and add oil and gasoline to engine as instructed. When ready to start engine, be sure that clutch is disengaged.

BRUSH HEIGHT ADJUSTMENT. Loosen large wing nut, Ref. No. 9, Fig. 2. To raise brushes to extreme height, pull sweeping unit forward as far as slots in brush adjustment brackets, Ref. No. 11, Fig. 2, will permit. To lower brushes to lowest position, push sweeping unit backwards as far as slots will permit. Secure wing nut when desired brush adjustment is obtained.

1. For grass clippings or leaves, adjust hood extension, Ref. No. 10, Fig. 3, and brushes to highest positions. After trial run on lawn, should the settings be too high, lower slightly and try again until correct setting is found. Brush life may be prolonged by adjusting so contact with ground is light.

2. For patio, sidewalk, and driveway sweeping, adjust hood extension to bottom position. Also adjust brushes so they just contact cement. Remember, always keep engine approximately level at all times.

NOTE: IF SWEEPER PUSHES HARD, THE BRUSHES OR HOOD ARE SET TOO LOW.

BASKET. Basket is removable for dumping.

MAINTENANCE. Oil sweeper at points marked "oil" (see Fig. 1), every time machine is used or once or twice a day when machine is used all day. Wet grass clippings have a tendency to dry and adhere to inner face of hood; it is important to keep this face clean at all times for good sweeping action. The canvas will give longer life if it is never folded when wet or damp.

ALWAYS GIVE THE FOLLOWING INFORMATION WHEN ORDERING REPAIR PARTS

Order all parts from your nearest dealer.

1. Part Number and Quantity.
2. Model Number (found on hood).
3. Year Model.

Your unit is right hand (R.H.) or left hand (L.H.) as you stand behind it.

*Standard hardware items may be purchased locally.
